XML Many functions in AutoCAD are documented using XML, a set of tags used to provide a documentation mechanism for text and drawings in both the internal and in file formats. Some of the elements in the XML format include drawing labels, annotations, and text properties. The format allows the user to create custom tags as well. There are a large number of third party XML libraries for AutoCAD. There are also third party XML viewers that show the XML tags and elements in AutoCAD. Programming and scripting languages AutoCAD is supported by a number of languages and has a variety of extensions and scripting mechanisms. AutoLISP and Visual LISP are CAD-specific languages that were historically popular for plugin development. AutoCAD also supports C++ and C# extensions, as well as .NET. There is an ObjectARX class library based on C++ and C# that can be used in AutoCAD-based applications, as well as in applications built with Delphi, Ruby, and Python. There are a number of popular programming and scripting languages that support the AutoCAD API. These include: Autodesk Python Delphi Lua Ruby VBA Visual LISP Autodesk Xpress for AutoCAD and Alias Autodesk Xpress for AutoCAD and Alias was the first version of AutoCAD that fully supported the OS platform. It has a better interface, more advanced features, including layers and blocks, and better printing support than previous versions. Xpress for AutoCAD and Alias was available for Windows, Linux and OS/2. The Xpress for AutoCAD product line was discontinued on 30 September 2013, however Autodesk continues to provide updates. Autodesk All-in-One Software (AIO) for AutoCAD Autodesk All-in-One Software (AIO) for AutoCAD is a cloud-based product that was released in June 2017. It is a new all-in-one solution, designed to cater for all AutoCAD requirements.
